Store, View & Manage Your Asset Information

Plowman Craven's new data portal helps designers, engineers and asset owners to organise and manage all of their survey data through a secure, web-based application that can be accessed on any device in any location.

Thanks to Plowman Craven's unique 3D visualisation capabilities, stakeholders can effectively view any asset from the comfort of an office, saving both time and money.

The system's in-built BIM tools enable data-sets to be interrogated and measured without the need for specialist software or training.

Built on secure, cloud-based technologies the Plowman Craven portal provides comprehensive management of vast data sets across numerous assets.

- **Secure** cloud-based storage of all survey data assets
- **Accessible** from any computer, tablet or mobile device
- Complete **asset management** of vast datasets
- **View your data** without the need for specialist software or training
- **All data types** – from BIM & Point Clouds to Video and UAV data
- Google Maps interface matches survey data with **asset location**
- No Common Data Environment? **No problem!** Our portal incorporates ISO 19650 compliant file storage and metadata
